

Using Bar Models in Addition and Subtraction

1. Can you write an addition and a subtraction calculation for each bar using the given numbers?

2. Can you write an addition and a subtraction calculation for each bar using the given numbers?

a) $6509 + 2170 = \underline{\hspace{2cm}}$

b) $1890 - 362 = \underline{\hspace{2cm}}$

c) $5002 - \underline{\hspace{2cm}} = 2450$

3. Now, draw a bar model in the space below the question to help you to solve the problems below.

a) Sally has 7310 football cards in her collection folder. The whole folder holds 9000 football cards in total. How many more football cards does Sally need to complete her collection?

b) The fish and chip shop had 4056 haddocks in their freezer. The shopkeeper ordered another 2300 haddocks from the wholesalers. How many haddocks do they now have in total?

Challenge

Now it's your turn...can you invent a word problem that involves the numbers 7318, 5395 and 1923? Can you draw and label a bar model to help you **show** the maths in your chosen calculation?
